Salinity treatment Products

بروسبر
أوزمو برو
PROSPER
Osmo
PRO

The ideal solution to combat salt
and heat stress

Benefits :-

Osmo Pro is the ideal solution to reduce the effects of salt and heat stress on plants, as it contains proline and glycine betaine in free form. Both maintain the water content inside the cell and thus reduce osmotic stress inside the plant

Osmo Pro helps preserve cell content from oxidation, which can cause damage to enzymes, nucleic acids, proteins, and fatty acids, which negatively affects all vital processes within the plant.
